Subject: Dangerous Goods Special Provisions

Dear SUPERSEN Customers and Carriers:

Please accept this certification, declared for all applicable part numbers, which provides for the unregulated shipment of pressurized articles per IATA Special Provision A114.

We state that the following is true for all parts manufactured by Super Sheng Enterprise CO., LTD.

- 1) Each article has a gas space capacity not exceeding 1.6 L and a charge pressure not exceeding 280 bars where the product of the capacity (litres) and charge pressure (bars) does not exceed 80 (i.e. 0.5 L gas and 160 bar charge pressure, 1 L gas space and 80 bar charge pressure, 1.6 L gas space and 50 bar charge pressure, 0.28 L gas space and 280 bar charge pressure);
- 2) Each article has a minimum burst pressure of 4 times the charge pressure at 20 degrees C for products not exceeding 0.5 L gas space capacity and 5 times charge pressure for products greater than 0.5 L gas space capacity.
- 3) Each article is manufactured from material that will not fragment upon rupture.
- 4) Each article is manufactured in accordance with a quality assurance standard acceptable to the appropriate national authority.
- 5) The design type has been subjected to a fire test demonstration that pressure in the article is relieved, by means of a fire degradable seal or other pressure relief device such that the article will not fragment and the article does not rocket.
